## Descriptive Summary

<b>Creator Information</b>	Gilbreth, Frank B., 1868 – 1924 Gilbreth, Lillian M., 1878-1972
<b>Title</b>	Gilbreth Library of Management Research and Professional papers
<b>Collection Identifier</b>	MSP 8
<b>Date Span</b>	1845-1959 [bulk dates 1906-1924]
<b>Abstract</b>	The Gilbreth Library of Management consists of the working papers of Frank and Lillian Gilbreth which covers their research in the fields of time management and motion study. These files are typically referred to as the “N-file.” Materials in the N-file include photographs, manuscripts, correspondence, notes, blueprints, newspaper clippings, reports, and research materials collected by the Gilbreths.
<b>Extent</b>	100 cubic feet (193 boxes)
<b>Finding Aid Author</b>	Joanne Mendes, 2006; additions by Mary Segó 2009
<b>Languages</b>	English
<b>Repository</b>	Virginia Kelly Karnes Archives and Special Collections Research Center, Purdue University Libraries

## Administrative Information

<b>Location Information:</b>	ASC
<b>Access Restrictions:</b>	Collection is open for research.
<b>Acquisition Information:</b>	Donated by Dr. Lillian M. Gilbreth, 1939
<b>Custodial History:</b>	Dr. Lillian Gilbreth donated the collection to Purdue University in 1939. The collection was shipped to the university in 1940 and was sorted and processed on site by Dr. Gilbreth. A small portion of the collection including the personal books of Frank and Lillian Gilbreth is housed at Purdue’s Industrial Engineering Department located in Grissom Hall.

**Preferred Citation:** MSP 8, Gilbreth Library of Management Research and Professional papers, Archives and Special Collections, Purdue University Libraries

**Copyright Notice:** Copyright and literary rights are held by the Gilbreth family.

## **Related Materials**

### **The Frank and Lillian Gilbreth papers**

The Frank and Lillian Gilbreth papers were donated to Purdue University by the Gilbreth family following the death of Dr. Lillian M. Gilbreth in 1972. The collection documents the personal and working relationship between Frank and Lillian Gilbreth, the family life of the Gilbreths, and Lillian's career following Frank's death in 1924 until her retirement in 1968. The collection includes: correspondence, manuscripts, reports, photographs, motion picture films, audio recordings, scrapbooks, awards, newspaper clippings, and artifacts.

### **The Gilbreth Book Library**

The Gilbreth Book Library contains the personal library of Frank and Lillian Gilbreth and consists of approximately five hundred books and sixty journals. Subjects include: management, psychology, labor relations, industrial economics, education, construction, engineering, health, home economics, and photography. [Note: the library is housed at Purdue's Industrial Engineering Department located at Grissom Hall and is available by appointment only]

### **A. A. Potter Papers**

Andrey A. Potter was a nationally recognized leader in engineering and scientific education and served as the Dean of Engineering at Purdue University from 1920 until his retirement in 1953. He was close personal friends with Frank and Lillian Gilbreth and was instrumental in bringing Lillian into the engineering faculty at Purdue in 1935. The Potter Papers contain personal correspondence between Potter and the Gilbreths, photographs, and clippings that Potter collected regarding Lillian's career.

### **Edward C. Elliott Papers**

Purdue President Edward C. Elliott persuaded Lillian Gilbreth to join the faculty at Purdue in the 1930s in an effort to promote educational opportunities in the sciences for young women. The Elliott Papers contain newspaper clippings and correspondence regarding Lillian Gilbreth.

## Subject Headings

### Persons

Gilbreth, Frank Bunker, 1868-1924  
Gilbreth, Lillian Moller, 1878-1972  
Gantt, Henry Laurence, 1861-1919  
Taylor, Frederick Winslow, 1856-1915  
Potter, A. A. (Andrey Abraham), b. 1882  
Elliott, Edward C. (Edward Charles), 1874-1960  
Hoover, Herbert, 1874-1964  
Hoover, Lou Henry, 1874-1944

## Biographies of Frank and Lillian Gilbreth

Frank Bunker Gilbreth was born July 7, 1868 to John and Martha (Bunker) Gilbreth of Fairfield, Maine. The youngest of three children, Frank enjoyed a quiet childhood until his father's sudden death from pneumonia in 1871. For financial reasons, his mother was forced to move Frank and his sisters, Anne and Mary, to Boston where Martha opened a boardinghouse. Martha successfully managed the boarding house and along with a small income from her sister Caroline's artwork, was able to support the family and put her two daughters through college. After passing the MIT entrance exams in the summer of 1885, Frank decided to forgo higher education and entered the construction trade as a bricklayer's assistant. Frank noted that the bricklayers with whom he trained all had different approaches to bricklaying and he soon devised a method which eliminated unnecessary motions and greatly increased productivity. Frank quickly worked his way up within the company and was soon able to support his mother and aunt. In 1895, he started his own contracting firm, Frank Gilbreth and Company. The company became famous for finishing projects early and under budget. In 1902, Frank's firm finished building a laboratory for MIT in eleven weeks, a feat which so impressed a young engineering student that he begged the president of the university to arrange a meeting. The student was Andrey Potter (who later became the dean of engineering at Purdue University) and he and Frank Gilbreth became lifelong friends.

Lillian Evelyn Moller was born May 24, 1878 in Oakland, California to William Moller, a successful plumbing business owner, and Annie Delger Moller. The oldest surviving daughter of nine children, Lillian became adept at aiding her often ailing mother in the management of a large well-to-do household. A shy child, Lillian was home-schooled by her mother until she was nine. Once in school, Lillian excelled at her studies and ended up graduating high school with straight As. In 1896, she entered the University of California and became the first woman in the university's history to deliver a commencement address when she graduated in 1900. The following fall, Lillian moved to New York to start her graduate work at Columbia University. An illness forced her to return to California but in 1901 she returned to the University of California and earned a master's degree in literature. In the spring of 1903, Lillian, along with a group of friends, set out for the East Coast to begin a six month tour of Europe. They arrived in Boston and had a few days to sightsee before boarding their ship. One of her friends, Minnie Bunker, introduced Lillian to her cousin, Frank Bunker Gilbreth. Frank, a confirmed bachelor, became infatuated with Lillian and was waiting at the dock when her ship returned. Six months after their first meeting he proposed and on October 19, 1904 Frank and Lillian were married in the living room of her parents' home in Oakland, California.

The marriage of Frank and Lillian Gilbreth began one of the most famous partnerships in engineering history. Lillian immediately became a full partner in Frank's business, working with him first from home but soon joining him on job sites, at business meetings, and participating in industrial conferences. Frank relied on Lillian tremendously and affectionately referred to her as "Boss." They collaborated on papers,

speeches, lectures, and co-authored four books. In 1907, Frank met Frederick Winslow Taylor, the developer of time study, and became a disciple of the Taylor System. The Gilbreths became deeply involved in scientific management research and Frank was instrumental in the creation of the Taylor Society. In 1912, the Gilbreths left construction and focused their attention on scientific management consulting. They broke with Taylor in 1914 and formed their own form of scientific management which focused on the human element as well as the technical. In 1915, Lillian received her doctorate in psychology and incorporated her training into the family business. She saw the need to improve worker satisfaction which would in turn improve overall job performance and worker efficiency. Frank designed his systems to ease worker fatigue and increase productivity by studying each movement a worker made in a process he called micromotion study. The Gilbreths used still photographs and film strips to study worker movement in order to devise the "One Best Way" to perform a task. The Gilbreths also saw the need to improve the physical comfort of the worker and their innovations in office furniture design were ahead of their time and led the way to the study of ergonomics.

The Gilbreths' work in time management and efficiency carried over into their personal lives. Early on, Frank and Lillian agreed to have twelve children, six boys and six girls, a feat which they accomplished in seventeen years. The children Anne, Mary (died at the age of six from diphtheria), Ernestine, Martha, Frank Jr., Bill, Lillian, Fred, Dan, John, Bob, and Jane soon became willing participants in their parents' studies. The older children were assigned younger siblings to care for and all had daily housekeeping tasks, including the toddlers, who were given table legs to dust. Often Frank would recruit the children for help with his research including his motion studies on typing and surgery. The Gilbreths' success raising a large family in which both parents worked full time was a testimony to their achievements in management and efficiency and their love for one another. After Frank's sudden death from a heart attack in 1924, Lillian not only carried on with their work but also managed to put every child through college. Lillian retired in 1968 and died January 2, 1972.

## Scope and Contents of the Collection

The Gilbreth Library of Management documents the pioneering research of Frank and Lillian Gilbreth in the fields of time and motion study. Commonly referred to as the N-file, the collection covers the Gilbreths' quest to find "The One Best Way" in job performance, worker satisfaction, efficient office management, and home economics. Types of material in the N-file include photographs, manuscripts, correspondence, notes, blueprints, newspaper clippings, reports, and research materials collected by the Gilbreths. Subjects include time study, motion study, fatigue in the workplace, psychology, photography, ergonomics, management, construction, and creating work environments geared toward the handicapped. Company files in the collection include: New England Butt Company, Regal Shoe Company, Remington Typewriter Company, Sears & Roebuck, National Cash Register, Pierce Arrow, Eastman Kodak, Lever Brothers, and Cluett Peabody & Company. A small portion of the collection covers the Gilbreths' family life and Frank's army career during World War I. The collection is organized into four series:

1. **N-file, ca. 1845-1941 (71.5 cubic feet)**
2. **N-file Oversized, ca. 1914-1919 (1 cubic foot)**
3. **N-file Photographs, ca. 1908-1941 (11.5 cubic feet)**
4. **N-file Blueprints, ca. 1906-1937 (8 cubic feet)**

## Arrangement Note

The collection was shipped to the university in 1940 and was sorted and processed on site by Dr. Gilbreth. The original order of the materials as established by the Gilbreths has been retained. The N-file is arranged in a mnemonic filing system devised by Frank Gilbreth using letters to file by subject without the need for an index. The original letter system is located on each file. The file numbers were added later to avoid confusion with similar lettered files. A control index regarding the mnemonic filing system is located in the addendum.

## Preservation Note

All materials have been housed in acid-free, lignin-free folders and boxes. All newsprint has been photocopied. Oversized printed materials, blueprints, and photographs have been grouped into individual series for preservation purposes.

## Additions to Collection

Additions to the collection have been separated into the N-file Addendum file. Addendum materials were added to the collection over time by Dr. Lillian Gilbreth and the Purdue Libraries. The majority of the materials cover the N-file and the mnemonic filing system.

**Series One**  
**N-file, ca. 1845-1941**  
71.5 cubic feet

- Location VT    Box 1    Various Studies and Photo Captions, ca. 1914-1940**

Gilbreth Library: The Defense Program, 1941

[letter from Lillian Gilbreth authorizing use of the  
Gilbreth Library of Management in Dean Potter's  
Defense Program]

N-file Mnemonic Filing System, 1957

[paper explaining the mnemonic filing system used  
by Frank Gilbreth]

Photography, 1953-1959

[clippings regarding the use of photography in  
research]

Classification of Gilbreth Library by Courses, 1940

[list of classifications of the Gilbreth Library by  
Purdue University School of Engineering courses]

Gilbreth Related Materials, n.d.

[paper by Lillian Gilbreth, a student paper regarding  
Frank Gilbreth, and clippings regarding Lillian  
Gilbreth]

Gilbreth Articles, n.d.

[partial list of Gilbreth articles in N-file]

Note Card Index, n.d.

[partial list of cards typed from Frank Gilbreth's  
notes]

Control Index, 1940

[N-file control index by subject]

**N-file Addendum, ca. 1910-1959**

Boxes 184 – 193 are items that were transferred from the Gilbreth  
Library in Grissom Hall the summer of 2009.

**Location VT    Box 184    N-file Addendum, ca. 1913-1915**

First Summer School of Management, 1913

[A summer course in Scientific Management, given  
by Frank B. Gilbreth. Course of Lectures, Laboratory

Practice and Field Observations in Scientific Management during August, 1913, in Providence, Rhode Island. The course was designed Especially for Professors, Instructors and Graduate Students in Engineering and Business Administration.]  
Summer School Notes – First Summer School in Scientific Management, Providence, Rhode Island, August, 1913.

[The notes are entirely of the lectures delivered by Mr. Gilbreth and the invited speakers. All digests of papers, Books, magazine articles, etc. required as outside reading were omitted. This edition is also not illustrated. A few sketches have been used but only those necessary to explain the context of the lectures. Inscribed: To Mr. Frank B. Gilbreth, my teacher, my leader, and a man I am glad to call my friend with sincere appreciation, Frederick Eames Cooper].

Second Summer Course in Scientific Management, Frank B. Gilbreth – August, 1914, in Providence, Rhode Island.  
[volume 1-4]

Third Summer School of Management, Frank B. Gilbreth, August, 1915,  
[volume 1-4]

**Location VT    Box 185**

**N-file Addendum, 1920**

Wire Motion Model, 1920

[black wooden box, 8 ½” x 8 ½”, with white graph marks]

Motion Model File, 1920

[photocopied pages containing photos of Frank Gilbreth with wire model, along with notations in margins. Handwriting on front of file states, “Frank & Lillian Gilbreth, Motion study for the Handicapp” (?) Handwriting not clear.

**Location VT    Box 186**

**N-file Addendum, ca. 1910-1927**

Papers on Management, ca. 1910-1912

[volume 1 contains articles by various authors, with table of contents]

Papers on Management, ca. 1911-1912

[volumes 2 and 3 contain articles by various authors, with table of contents]

The Application of Scientific Management to the Work of The Nurse by Frank B. Gilbreth

[a paper read before the Eighteenth Annual  
Convention of the American Society of  
Superintendents of Training Schools For Nurses,  
1912. Springfield, MA: Thatcher Art Printing.]  
Measuring Our Outputs to Date, signed to LMG from  
FBG, 12/25/1912

[The present state of the Art of Industrial  
Management Majority Report of Sub-Committee on  
Administration, pp. 1601-1622 - notations in margins]  
The Magic of Motion Study, by Reginold T. Townsend  
[no publication information available]

Home Reading Box Movement - Tentative Report of  
Progress, ca. 1913-1914

[Providence section, to Frank B. Gilbreth by  
Frederick Eames Cooper]

Time Study and Motion Study: as fundamental factors in  
Planning and Control

[An indictment of stop-watch time study, read  
before the New York Section of The Taylor  
Society, December, 16, 1920, by Frank B.  
Gilbreth, member of the Taylor Society and L.M.  
Gilbreth, non-member]

Binder containing articles written by Lillian and Frank  
Gilbreth, ca, 1915-1925

Teacher's College Conference on Home-Making,  
Wednesdays, March 2 – April 20, 1927

[scrapbook of daily program of the conferences  
and  
examples of materials and forms used, along with  
another volume containing typewritten  
manuscripts of the papers presented – Directed by  
Dr. Lillian M. Gilbreth, Consulting Engineer,  
with the assistance of Professor Emma H.  
Gunther, Teachers College, Columbia  
University.]

Marriage and a Career

[article by Lillian Gilbreth, contained in issue of  
Vox

Studentium, vol. IV, no. 3, 1927, pp.5-6]

The Trained Woman and the Economic Crisis

[a study made by the American Woman's  
Association in

Cooperation with the President's Emergency  
Committee for Employment, November, 1931.

New

York: The American Woman's Association.]

Methods Applied to Distribution Problems by Retailers  
[summary of papers presented at the  
International Congress for Scientific  
Management, London, 1935]

Frank and Lillian Gilbreth: Partners For Life, 1949  
[original manuscript for book, stamped Received,  
Feb 25, 1949, Van Rees Comp. Co.]  
Micro-Motion Chart Data, with notations, no date

**Location VT Box 190 N-file Addendum, ca 1822-24**

[Box X]  
Psychological Bulletin Book, edited by John A. McGeoch,  
State University of Iowa, 1939  
The Work and Aims of The Taylor Society, by Percy S.  
Brown, 1925  
[article]  
Institute for the Technical Management of Industry, 1926  
[report]

Scientific Management, by Doc. Dr. Vaclav Verunac, 1924  
Masaryk Academy of Work (M.A.W.), by Dr. Ing. B. Tolman, 1924  
    [Its Beginnings, Development, Organization, and Aim]  
Industrial Research in the United States, by Maurice Holland, 1924  
On Machinery For Calculating and Printing Mathematical Tables, 1822  
The Skoda Works, 1869  
The Skoda Works Limited Co., 1924  
The Quest of The One Best Way, by Lillian Moller Gilbreth, 1924  
    [a sketch of the life of Frank Bunker Gilbreth]  
A List of Bibliographies on Industrial Engineering and Management, 1920  
Bibliographies on Educational Subjects, 1914  
Bibliographies on Educational Psychology, 1913

**Box 191 N-file Addendum, ca 1913-1945**

[Box Y]  
Scientific Management: a history and criticism, by Horace Bookwalter Drury, Ph.D., 1918  
United States Department of Commerce and its Relation to Business, H. Lawrence Groves, 1924  
The Problem of Efficient National Administration, W. F. Willoughby, 1924  
Some Problems of American Railway Management, Roy V. Wright, 1924  
The Education of an Engineer for Industry, J. Prokop, 1924  
Training for Engineers, Doc. Dr. Vaclav Verunac, 1924  
Overhead Control to Increase Net Profits, Chester S. Carney, 1930  
Scientific Management-Nature, Achievements and Tendencies, Fred J. Miller, 1924  
What's Ahead for Management, Lillian M. Gilbreth, 1926  
Study of Industrial Processes as a Tool in the Training of School Workers, Mildred Fairchild, 1928  
Public Relations in Industry, T. J. Ross, 1937  
Industrial Psychology as a Career, 1938  
    [report of the A. C. P. Committee on Psychology in Industry compiled by Richard Uhrbrock]  
Economy of Time in Education, James H. Baker, 1913  
Ib. The Importance of Scientific Management for

Mankind and For World Peace, Stan. Spacek, 1924  
 XIV. Education for the Profession of Engineering, Wm. E. Wickenden, 1924  
 XIII. The Role of Machinery in American Agriculture, H. R. Tolley, 1924  
 Merit Rating in Industry, Asa S. Knowles, 1940  
 Developments in Production and Management Engineering, 1945  
 Revitalizing the Working Force, Everard Stubbs, Winthrop P. Stevens, Clement J. Freund, et. al., 1936  
 A List of Bibliographies on Industrial Engineering and Management, 1920  
 How to Set Up a Program for Motion Economy, Allan H. Mogensen, 1935  
     [article]  
 Engineering Encounters Human Nature, Elliott Dunlap Smith, 1931  
     [article]  
 Color Increases Shop Efficiency, T. J. Maloney, 1932  
     [article]  
 Mechanical Engineering Article, L. P. Alford, vol. 49, number 4, 1927  
     [Laws of Manufacturing Man]  
 Motion Study in a Job Shop, E. L. Berry and H. C. Robson, 1932  
     [article]  
 Testing Machinability by Drilling, 1924  
     [article]  
 America's Industrial Future, Mechanical Engineering, v. 50, no. 3, March, 1928  
     [article]  
 Photomicrography and Its Application to Mechanical Engineering, Francis F. Lucas, No Date  
     [article]  
 Has Taylorism Survived, Dexter S. Kimball, 1927  
     [article]  
 Engineering and the Human Values, Ralph E. Flanders, 1929  
     [article]  
 Motion Economy in Practice, 1932  
     [article]  
 Principles of Jig and Fixture Practice, Joseph W. Roe, 1928  
     [article]  
 XIIIb. Scientific Management of Grain and Bread Production, Professor Karel Branberger, 1924

Motion Study with the Stop Watch, E. H. MacNiece,  
1932  
[article]  
The Work Required to Operate Several Makes of  
Typewriter, F. H. Norton, no date  
[article]  
Management and Administration in Manufacturing  
Industries, No. 1, July, 1924  
Mechanical Engineering – Vol. 47, No. 11a, including  
The Engineering Index, 1925  
Work-World Environment, M. Luckiesh, July, 1931  
The Designer's Work Primarily in the Discovery of His  
Problem, Mechanical Engineering, July, 1929  
Speech Therapy  
[pamphlet listing books and monographs dealing  
with teaching of speech correction, no date]

**Box 192 N-file Addendum, ca 1920-1941**

[Box Z]  
Letters to Dr. Lillian M. Gilbreth from the National  
Research Council, American Society of Mechanical  
Engineers, Dept. of State, Purdue University President,  
1927, 1935, 1937  
Proceedings of the Sixth International Congress for  
Scientific Management, 1935  
Engineering Drawing Problems, 1934  
Miscellaneous Papers on Management, 1938  
[University of Iowa Reprints in Engineering]
