History of the Department of Agronomy

It is believed that the Department of Agronomy began around 1907, but curricula in agronomic subjects and crop experiments date as early as 1882, when Professor William O. Latta conducted experiments on corn, wheat, and oats. Today, the Agronomy Department regards Latta as Purdue's "first agronomist." Actual Agronomy courses first appeared in the 1905-1906 Purdue course catalog, and in 1908, Alfred T. Wiancko was appointed the first official head of the as the School of Agriculture's Department of Agronomy. The department awarded its first masters of science degree in 1913 and its first PhD twenty-one years later. Agronomy awarded 1,375 graduate degrees by the end of 2005. Agronomy became a department within Purdue's Agricultural Experiment Station in 1908.

Collection Description

Scope

The College of Agriculture, Department of Agronomy, Records (1879-2011; 18.1 cubic feet) includes an impressive collection of correspondence, field notebooks, photographs, reports, slides, and other materials.

The records are organized into a single series with items arranged chronologically by document type.

Descriptive Rules

Describing Archives: A Content Standard

Processing Information

All materials are housed in acid-free boxes. Some materials are housed in acid-free folders. Lantern slides and most photographs and negatives in the collection have been placed in protective acid-free sleeves and envelopes.

Revision History

Collection identifier updated from UA 14.04 to UA 27 as of November 18, 2015.
